Relevant Client Experience

Functional Architect - Sears Holding Companies

JDA Fulfillment, Demand, Collaborate

Functional Architect on a large business transformation initiative. Will be integrating multiple business units under single 7.5 JDA platform. As designed, would be the largest JDA installation in terms of SKU count.

Engagement Manager & Functional Architect – Sara Lee

JDA Fulfillment, Demand, Collaborate, Transport, Freight Payment

Project spanning multiple projects and years. The projects consisted of a solution assessment and stabilization, integration design and enhancements, supply chain business unit consolidation, business process redesign, solution upgrade, and APS solution integration to a new ERP system.

Project Manager & Functional Architect - Sulzer Orthopedics

JDA Fulfillment, Demand, Master Planning, Collaborate

Acted as the global project manager for an implementation that consisted of JDA Demand, Collaborate, Monitor, Strategy, Master Planning, and Fulfillment, and Oracle 11i Supplier Scheduling. The project consisted of process design, technical design, prototyping, pilot, and roll out activities.

Project Manager & Functional Architect - Exide Batteries

JDA Demand, Fulfillment, CPP

Project manager for an implementation consisting of JDA Demand Planning, Fulfillment, and CPP. The project included process design, prototyping, pilot, and roll out for North American operations.

Functional Team Lead - Unilever

JDA Demand, Fulfillment

Rollout of SAP SD/MM/PP, JDA Demand and Supply Planning. Responsibilities included solution design & vendor selection; implementation utilizing PwC's RapidPath methodology; management responsibilities for 6 FTE's and multiple SME's; full life cycle implementation of new demand planning, distribution requirements planning, constrained production planning, transportation load building processes, integration with SAP R/3, to support business requirements.
